

THE HDD UTILITY CHECKLIST

The Field-Proven Checklist for
Choosing the Right HDD Partner

FIELD-TESTED
CHECKLIST

THE DIFFERENCE BETWEEN A SMOOTH INSTALL
AND A **COSTLY MISTAKE** IS WHO YOU TRUST TO DRILL IT.

1 VERIFY THE CREW BEHIND THE RIG

- ☐ Master Driller on staff (5,000+ hours experience)
- ☐ Master Locator on staff (5,000+ hours experience)
- ☐ Dedicated drilling mud specialist
- ☐ Certified fusion technician
- ☐ OSHA 10 & 30 certified (entire crew)
- ☐ TRIR below 0.5
- ☐ Zero-marked utility strikes annually
- ☐ Less than 1 unmarked strike per year

EXPERIENCE
THAT MATTERS

SAFETY
THAT PROTECTS

ACCURACY
YOU CAN TRUST

2 REQUIRE COMPLETE PROJECT RECORDS

- ☐ Locator logs
- ☐ Drilling mud logs
- ☐ Bore logs
- ☐ GPS tracking data

3 CONFIRM THE AS-BUILT DETAILS

Post Install Verification

- ☐ Final bore path documented
- ☐ All utilities crossed identified
- ☐ Equipment used recorded
- ☐ Conduit material and size verified

4 PRECISION PULL™ INSTALLATION METHOD

Single-entry drilling for tight tolerances
and gravity-critical applications.

- Blind (single-entry) bore technique
- Ideal for gravity drain applications requiring precise invert
- Supports pipe diameters up to 8 inches
- Maximum bore length: 2,000 ft
- Compatible materials: HDPE, PVC, Stainless Steel
